

Yes! see for yourself...

1st) FOLD A NEW \$20 BILL THIS WAY

2nd) CONTINUE TO FOLD THIS WAY

Compare your fold precisely to this picture.

3rd) FOLD THE RIGHT SIDE UNDER,
exactly as you folded the left side.

You'll immediately see the Pentagon ablaze! (red
circle)

4th) NOW FLIP IT OVER AND SEE OTHER SIDE

The Twin Towers of the World Trade Center are
hit and smoking.

What are the odds that a simple geometric folding of the \$20 bill
would *accidentally* contain a representation of both terror
attacks?

**COINCIDENCE? YOU
DECIDE!**

These two, you've seen...

FIRST there was the Pentagon burning...

#1

THEN the WTC Twin Towers...

#2

NOW THIS

#3...

What are the odds that a contorted wrinkling of the \$20 bill would *accidentally* contain one of the many spellings of his short 5-letter name?
